

How to Make Your Home More Energy Efficient - From the Outside In

Presented by:

Paul Knapp, President,
Sidetex

Attend this free seminar to learn
how making changes to your home's exterior
can reduce your energy costs!

Paul Knapp, President of Sidetex, will discuss the following
topics:

- How insulated siding can vastly reduce the wind chill coming through the walls of your home
- How energy efficient windows and doors can reduce your heating and cooling bills
- How new roofing can reduce cooling costs
- Also covered will be ways to make your kitchen and bathroom more energy efficient

Energize Connecticut – programs funded by a charge on customer energy bills.
